

## Home Monitoring in MyChart

Patients can manage their home monitoring within MyChart. You will need to have an active MyChart account for documentation and communication with the clinic. Your daily task submissions will be uploaded to the clinic where they will monitor your progress.

Try it Out:

1. Log in to your **MyChart** account.
2. From the **Home screen**, scroll down to your task. To complete your tasks, select the **View Tasks** button.
3. Your daily Home Monitoring **To Do** list will display. Select your questionnaire to begin filling it out. Tasks will become available daily after **8 AM Eastern Time**.

Fill out the **Questionnaire**.

Once the questionnaire is filled out, if you need to change any answers to the questions, you can select the pencil icon to the right.

When you are satisfied with your answers, select **Submit** to send them to the clinic.
